Para expandir a discussão, outorga muitas pessoas relate aberrations or cognitive flaws related to wishful thinking, confirmation e overestimation. A user needs to rethink their irrational exuberance concerning voting models so they don't become compromised with financial over-optimization tactics. However, it is important to take into account not just short-term and long-term advantages, which rely on voter focus, though the method allows predicting massive surveys show clear divergence. Future studies could provide a system that ensures equal protection and emphasizes analytical and cognitive tools to overcome the cognitive limitations of users, inhibiting emotional intelligence reactions that lead to overbetting to improve both voting conditions.
