In most slots, the rate is somewhere between 80% and 95%, but some games can exceed 95%. The basics of the return to player percentage indicate that if you bet \$100 on a game with an RTP of 94%, you'll win back \$94. But again, this is for long-term results since the rate was determined over millions of spins.

Cats slot game overview\n\n With an impressive wildlife theme, split symbols, and an amazing bonus round, this game has quickly become a top choice for online players. Cats features a maximum payout of 10,000x the bet during the base game, but payouts can be increased when free spins are triggered.

Use the five-spin slot strategy to play up to five spins at various slot machines. It's time to move on to the next machine if you receive non-0 wins. With the five-spin slot strategy, you are simply trying to get a taste of several machines rather than trying to win multiple times on one particular machine.

Casino slot machines typically have the highest payouts at 95%. This means that for every dollar you put in, the machine is programmed to give back 95% of it at some point. Other gambling locations such as airports, bars, grocery stores, and service stations typically stock machines that have a 50% to 75% payout.
