For Apple owners, there is a solution of its own. The interface of the iOS version is divided into two main parts: one displays upcoming events and the other displays current events. Even the sports are separated, but are available and can be displayed simultaneously.

All you have to do is follow the instructions. For the iPhone device, you have to go to Settings -> General -> Device Management. From the menu, locate the "Enterprise application" option. Then confirm the action in the pop-up window, and 1xBet is ready to run on your device.

Registering with 1xBet is fairly straightforward. Here, by default, you can do a quick authorisation by phone. In this case, you simply enter your number and the currency you want to bet in. You are also allowed to enter a promo code.

Other options are via email or social media, or express registration with 1xBet. However, the latter requires verification of your account at a later stage.

The app offers various types of sports news, such as virtual sports, softball, football, hockey, etc. Users can also play various types of casino games conducted by live dealers through Wheel of Fortune, 21, Russian Roulette and many others.
