Online gambling companies have noticed the opportunity that Twitch offers and have begun to respond. As of recently, it is now possible to watch as people stream their online gambling experience to the world. There are several reasons that make this a game-changer for the online gambling industry and gamblers alike. People can now gather together as a group and discuss the action taking place in real-time. Ideas, strategies, likes, and dislikes can all be put out in the open in a way that is fun and efficient. Before this development, the same kind of communal voice was only handled in the forums, and to reach any kind of conclusion about anything, one would have to spend hours upon hours reading other people's opinions with little to no chance for sharing your own thoughts or asking your own questions. Needless to say, this development brings a new level of transparency and teamwork to the online gaming universe. Another benefit to streaming online slots is that a seasoned player might like a particular game for one reason and another for an entirely different one. The viewers get an opportunity to see the differences between game styles and can then choose depending on what they did or did not like from watching the streamer. And maybe, more importantly, it benefits the gaming sites and production companies themselves, as it is the perfect chance to advertise games that normally either go unnoticed or are too new to have been played enough to be known. Companies can pay players to "try out" the games and show them to the world. It is an extremely easy way for these companies to advertise their products. A simple Twitch search for any of the common slots games will turn up plenty of user recorded streams of that particular game.
