## onabet cream vs luliconazole

Onabet 2% Creme is a antifungal medication used to treat fungal infections of the skin. It works by killing the fungus that causes infections such as athlete's foot, Dhobie Itch, candidiasis, ringworm and dry, scaly skin.

Onabet SD Solution is a antifungal medication that is used to treat fungal infections such as athlete's foot (infection between toes), Jock itch (infection of the groin area), ringworm and dry, scaly skin. It relieves pain, redness, and itching in the affected area and speeds up the healing process.
