Many factors can influence motivation and achievement in sport settings: a capacity for autonomy of the athletes, their competence and social ties established.

This study was a descriptive, aimed at analyzing the motivation level of soccer and volleyball teams in two counties of the state of Parana - Brazil, which have characteristics different socioeconomic and financial investments in relation to sports activities.

The study subjects were 47 athletes from volleyball and indoor soccer adult category.

To measure the level of motivation of the athletes was used Motivation Scale for Sport.

For comparison between groups used the Mann Whitney U test for non-normal data, the Student t test for independent normal data and analysis of variance Kruskal-Wallis, setting the significance level of 5%.
