The game of mahjong requires four players, 144 tiles and two dice to roll. It's important to note, however, that there are variations in how the game is played from country to country. The goal of mahjong is similar to poker, in that the aim is to make matching sets and pairs.

Secondly, the broad set of hidden information of the tiles makes Mahjong a much more difficult imperfect-information game than previously studied ones, such as Texas hold'em poker. Thirdly, the playing rule of Mahjong is much more complicated because of the various actions involved.

If you are in the early position or even the blinds, unless you have an excellent hand like pocket aces, kings, queens, ace king suited, or the bottom line - ace queen suited, you should fold all the other hands for the best result.

It's okay to fold big hands from time to time if your hand is vulnerable. Many poker players think they need to wait until later in the game to fold. However, if you can save yourself some money in a cash game, it's a good idea to fold earlier if things look dire.
