About This Game

The game consists of 4 parts: basic skills: 1: For the stand-alone game, you can play tournament games and heads-up games against professional-level AI opponents. The current price is R\$50. In the next version, the nash solver real-time calculation and decision-making function will be integrated in the decision assistant of the game. The price will be raised to R\$100, just to let you experience the value of GTO technology in real-time games. Advanced Features: 2: A complete set of Texas Hold'em calculation tools. 3: Simulator function: It can be used as an online Texas Hold'em game auxiliary tool for real-time calculation of various data and decision-making assistant tools, as well as a post-match review tool, or use the simulator as a hand training device. 4: Hand trainer: In the game, you can freely set your hole cards or a custom range, or set a certain type of player range, so as to train. These tool functions will be removed in one version and placed in another Poker Solver product. The entire new Solver tool product will be priced at R\$100/year, and the assistant inside will be R\$99/month, R\$799/year. The simulator, which integrates the computing power of the new version of Poker Solver, has been making steady money in real money games. The whole set of tools is better for live games than <https://rangeconverter/>. The Poker Assistant assistant version costs R\$5,000. The core functions of the new version of Poker Solver: 1: Solver tool set, with Pio Solver's Nash solver computing ability to solve the Headsup two-person game, and also has the core computing ability of 2~9-person table Icmizer3 multi-player Nash Solver, and cooperates with the poker simulator to complete the real-time Ability to calculate and review. 2: Poker complete set of mathematical calculation tools (Poker Tools). 3: Simulator and Assistant (Assistant), to meet the real-time calculation of the game and decision-making ability, as well as the resumption calculation ability. 4: The existing game function will become a customized practice function (Quiz), and 500 WSOP best hands are customized, and you can only play these specific hands. The version you buy now does not integrate these Solver product functions. This version only meets the AI battle function and specific card and range training functions of the same professional player level. At the same time, other Poker Solver tools do not have the game battle function in the Single player stand-alone game. Different products solve different problems. However, the AI in the Single Player stand-alone game will integrate the Nash Solver computing power when the upgraded version is released, allowing you to experience the effects and functions of the Solver. Although the current version does not have Nash computing, it can basically guarantee 70% of the decisions are correct. up. The new version of Poker Solver will be released in March 2024, and this Single player stand-alone game will be updated at the same time. This means that until March 2024, buyers can still experience the advanced features in Single player stand-alone games. The removal of these advanced features does not mean that the product is devalued. In the new version of the game, there are 4 advanced strategies for you to configure freely. In the game interface, you can still see the data analysis capabilities displayed by various upgraded advanced tools. The data displayed by these real-time calculations is valuable knowledge. The 4 strategies include: 1: Pio Preflop Chart 2: Push/Fold 3: Nash Equilibrium Solver 4: 10 Groups Range. The table below shows the functional price comparison between the computing tools in the game and other Texas-related computing products on the market. In this game, you can freely organize the table, freely set the blind level, freely set the hand range of each opponent, freely set the opponent's AI type, and freely set your own hand range, so that every time you deal You're dealt cards in this range, and you're free to set one of the 20 good cards for a definite workout. In the game, the complete real-time calculation of each player's various winning rate data on each street, listening

to the winning rate, and EV data saves you from the trouble of manual calculation, and will also give you AI decision-making suggestions from professional textbooks. These ensure you can complete on-demand training. and judging whether it makes sense to you. The complete display of these information in the game is also to help you analyze the game, so that you can know the logic of your own winning and losing, where you win and where you lose. There will no longer be any free version on the mobile phone, nor will there be any advertisements, and there will be no advertisements on all versions of the entire platform. New products and new features will be continuously released and updated. In the past two years, I have been researching and practicing the ability of Poker Solver, and will complete the release of new products next year. Extremely powerful solver ability. Regarding the price of the game, it will only become more and more expensive, because I am making more and more money in the game, so why should something of value be cheap. This is the long-term value compounding of self-development. Be careful and make valuable products, which is the original intention and purpose.

manualcore function:

- 1: Click the function board card to set the community card, and click the hole card icon to set the hole card.
- 2: Different player types can be set, and each player has a different range of actions. These ranges also determine different action logics.
- 3: Equity calculator, draw equity calculator, EV calculator, real-time poker simulator tool.
- 4: Real-time poker simulator tool, this is the most important for online professional players, which greatly simplifies the time consumption of thinking and performing calculations.
- 5: Advisor (advisor) provides you with a standard play, the basic guarantee is not to lose money.
- 6: Before the action decision, provide the EV value of different actions and betsize.
- 7: Practice the advisor and action EV in the battle mode.

Core value points:

- 1: Poker simulator tool: When playing poker online, professional players can display the complete mathematical data immediately after entering the opponent's range in real time according to the situation of the game table, saving users calculation time and energy, and providing standardized behavior suggestions. These real-time and accurate calculation data and standardized action suggestions help players make quick decisions.
- Value point: It saves the player's energy consumption in mathematical calculations in the game, and allows the player to invest more energy to focus on the accurate determination of the player's playing range and the use of real-time data to make decisions based on experience.
- Real-time display of all poker game data, which is not available in other tools. I combined the various data calculation functions scattered in multiple Texas poker calculation software into the real game. The player only needs to determine the opponent's range. In the simulator, Preflop and postflop are also purchased professional range action data, which can be set in the simulator: stacks deep, bet size, and player position to see the real-time advisor. Now this advisor is conservative.
- range data comes from rangeconverter/solution_formats/eight_max-MTT-Complete-Postflop-Addon-NEWOnlineViewer-yearly
- The core of the simulator is that you need to have the ability to judge the opponent's range of action. This is also one of the most basic and most important abilities of playing cards. If you don't have the ability to display the range of Texas Hold'em at all, then you can use this tool to repeatedly play poker to familiarize yourself with the range. In the battle mode I provide the ability to display the range in real time. Let you clearly see how different people in different ranges play, and those actions are standard textbook play styles for professional players.
- Real-time display of complete data: The data standard provided comes from the result of 10,000 times Equity calculated by Monte Carlo method. In the battle mode with AI, you need to turn on the observer mode switch (observer)
- Data in the avatar frame:

 - 1): EV: 0.70BB, indicating the EV data after the current operation. BB stands for the big blind value.
 - 2): equity data for each street: 2r: 4; 12.93%.

- Format: 2r (to river equity, calculated to river street Equity): rank (in the current surviving players, own 2r Equity ranked); equity (own real-time 2r Equity, 2r Equity calculated from your own perspective). Indicates that the Equity data to River Street is calculated based on the player's own hole cards against other players' range or hole cards.
- nd: 1; 72.67%. Format: nd (next street equity, your own Equity on the next street): rank (ranked your own nd Equity among the current surviving players); equity (your own real-time nd Equity, nd Equity calculated from your own perspective). Indicates that the nd Equity data to the next street is calculated according to the player's own hole cards against other players' range or hole cards.
- cp: 1; 88.23%. cp (current

street pure equity, the pure Equity of one's current street): rank (ranked of one's own cp Equity among the current surviving players); equity (your own real-time cp Equity, cp Equity calculated from your own perspective). Represents the calculated cp Equity data on the current street based on the player's own hole cards against other players' range or hole cards.Outs: 30, which indicates the number of draws made by players on that street. At this time, you can open the hands card strength information table, and you can see the probability of the current hole cards and board cards developing to various draws on each street.1: In preflop and river street, showing 2r is enough.2: On flop, turn street: displays the complete 2r, nd, cp data, and on flop, turn street, you can see the outs data of the player in that street at the same time.These real-time Equities and draw data assist in determining the hole cards against other players' hole cards or ranges, their own hands card strength and winning ability, and help them make action decisions on various streets.The betsize window at the top of the interface shows the human player (self) under the current action menu, the EV value ranking of each action in the action menu, the leftmost is the best, and it decreases from left to right (if there is only the leftmost data, then it is According to EV evaluation, this action is the most appropriate, and other actions do not need to be considered). This is based on the action logic shown by the EV. This is also the EV data of each action calculated by the player himself before the action. (The EV data in the avatar range is the EV data after the action, and the meaning of the two is different).This 4-speed EV table of betsize is the data display for making decisions based on EV when displaying the street.In fact, EV has no absolute correct meaning in action guidance before and after the flop (preflop and postflop), and it is not correct to make decisions based on the positive and negative EV.Advisor (Advisor): Shows the decision in this street, comprehensively assessing the following content: player's hole cards, opponents' range or hole cards, current own 2r, nd, cp Equity data and Equity ranked, and the player's own position Table position, player's current stacks deep, current number of people remaining at the table, EV data of each action in the current menu, and bankroll management. The current advisors tend to be conservative, and the goal is to try not to lose money.Advisor also implements a standardized pre-flop strategy in preflop.Advisor also implemented the post-flop strategy suggested by rangeconverter in postflop.In the battle against AI mode, you need to turn on the advisor mode switch (observer).Click on the user's avatar to open the user's scope, view or set the scope.Click on the hole cards, you can open to view or set the hole cards.Click on the board card, you can open to view or set the board card.In the simulator, click the D icon to switch the position of the dealer.Click the gray D icon to reset the position of the dealer.Regarding range setting or selection:1: Provides the standard range for various filling actions in the preflop stage.2: Provide 24 kinds of action ranges commonly used by professional players. Each professional player divides all hole card combinations into 10 action groups. You can see the action ranges of tag, lag, rock, maniac, and nit players.3: Provides a view of the opponent's mathematical action range based on the opponent's vPIP and PFR. VPIP and PFR can view these two values of opponents from third-party statistical software licensed online, such as holdem manager 2.The graphical Equity calculator provides a complete and correct Equity calculation function.I provide complete toflop, toturn, toriver's montecarlo and Enum calculation methods. It has the same effect as Power-Equilab, and its own data is guaranteed to be correct.When Power-Equilab calculates toflop and toturn, the data is often incorrect (why it is not, you will know by playing with his montecarlo and Enum methods, the longer the calculation, the greater the deviation of the two data, which is wrong), But the calculation result of to river is correct. It sells for R\$40/year. It does not have a real-time calculation method in the game. It is not suitable for actual combat, but only for review calculations, lacking actual combat significance.The provided Equity calculator, draw calculator, and EV calculator are all to ensure that you know the correctness of the data calculation results and allow you to trust the correctness and stability of the function.The AI in the battle mode comes from the range of 24 professional players. You can conduct targeted range confrontation strategy training.1): Various AIs and advisors use the same standard professional gameplay action logic. The difference from yours is only the hole cards and the action range.2): 14 types of chip depths (10BB~100BB, 200BB) are provided (different medals will open different new chip depths, and different chip depths will have different playing methods). Because of the

different chip depths, the card game will be played. The strategy is completely different.3): AI adopts the textbook style of professional players. You can understand the AI's action logic in thousands of matches, you can learn this action logic, and you can also find the corresponding exploiting AI logic. Repeated training can help you quickly identify the opponent's ability and the opponent's range. If it is in Steam, there is no sound.0: under \Steam\steamapps\common\Solo King-Single Player Texas Holdem Poker\Windows_Release, rename Windows_Release to Windows_Release11: Adjust your computer sound controller.2: You can download the game from D:\Steam\steamapps\common\Solo King-Single Player Texas Holdem Poker\Windows_ReleaseMove another folder, and then click TexasHoldEmSingle.exe to have sound.

Italia es eliminada de Euro 2024: un fracaso nacional y una búsqueda de culpables

Italia, la ciudad donde ganaron la Copa del Mundo de 2006, tiene un lugar especial en la imaginación del fútbol italiano. La perspectiva de regresar para un partido de octavos de final en la Eurocopa 2024 fue tan emocionante que hizo tropezar a un comentarista. Fabio Caressa, cuya repetición entusiasta de "gol de Grosso" se volvió casi tan icónica como el gol de ese jugador en la semifinal hace 18 años, tartamudeó por un momento después del empate de Mattia Zaccagni contra Croacia el lunes y no pudo hablar por un momento.

Sin embargo, Caressa no tuvo problemas para encontrar las palabras, el sábado por la noche, después de que *La Azzurri* fueran eliminados por una derrota de 2-0 ante Suiza. "La forma en que jugamos anoche fue inaceptable", dijo Caressa durante una discusión posterior al partido en el canal deportivo italiano Sky Sport. "Tenemos que poder decir eso. Este partido fue insopportable... este no es el nivel de nuestra selección nacional."

Relacionado: Suiza supera a Italia y alcanza los cuartos de final, poniendo fin a la agonía de Spalletti

Sus palabras fueron respaldadas por los periódicos del domingo por la mañana. La portada de Il Corriere dello Sport lamentó "Una vergüenza", con un subtítulo que describe a la selección nacional como "incapaz de jugar al fútbol". Tuttosport lo llamó "Un fracaso nacional", mientras que La Gazzetta dello Sport optó por "Todo para reconstruir".

Las únicas diferencias giraron en torno a quién debería encargarse de la reconstrucción. Spalletti dejó en claro durante su conferencia de prensa posterior al juego que le gustaría continuar, destacando el hecho de que solo había estado a cargo de la selección nacional durante 10 juegos previos a este torneo.

Sin embargo, su intención declarada de buscar jugadores mejor adaptados a su visión de fútbol no cayó bien entre parte de su audiencia. "El buen sastre corta un traje a la medida de su cliente", escribió Luigi Garlando en el mismo artículo. "No les impone uno".

Incluso más allá del mal desempeño de Italia en la cancha, las interacciones de Spalletti con la prensa esta semana han llevado a algunos a cuestionar si tiene la actitud adecuada para liderar la selección nacional. Hizo una llamada telefónica a las 2 de la mañana para disculparse con un periodista el martes después de usar un lenguaje grosero al acusarlos de filtrar información desde el vestuario.

"Cualquiera que haya seguido la aventura de Luciano Spalletti desde el principio sabe cuánta

pasión ha puesto en la causa", escribió Garlando en el mismo artículo. "Tal vez fue incluso demasiado amor lo que lo llevó a cometer tantos errores."

Como seguir o jogo que fez o mundo chorar?

Essa é a pergunta que persegue o escritor Graham Parkes desde o lançamento de < Before Your Eyes >, vencedor do BAFTA **bet 365 cadastro** 2024. O jogo de controle de webcam BR os blinks dos jogadores para avançar rapidamente pelas lembranças do protagonista Benny, entrando e saindo de momentos edificantes e arrasadores de **bet 365 cadastro** existência. Rapidamente ganhou a reputação de tearjerker no Twitch, com **bet 365 cadastro** história afetiva e meses de miséria provocada pela pandemia criando uma tempestade perfeita para enxugar os olhos.

"Como escritor, isso definitivamente tem sido intimidadora", diz Parkes. "Estou interessado **bet 365 cadastro** usar jogos para contar histórias concisas e emocionantes, mas não podemos dizer que cada vez vamos te fazer chorar."

Promessa de uma sequência emocionante

Mesmo sem lágrimas, as coisas estão parecendo bastante promissoras para o seguimento intrigante de < Before Your Eyes >, < Goodnight Universe >. Desenvolvido pelo Nice Dream, um estúdio totalmente novo formado pelos criadores Graham Parkes e Oliver Lewin, Goodnight Universe já ganhou o prêmio de jogo de 2024 no Festival de Filmes de Tribeca, derrotando o brilhante Thank Goodness You're Here!

Emoção... Goodnight Universe [aposta personalizada bet nacional](#)

A premissa de < Goodnight Universe >? "Você joga como um bebê psíquico", diz Parkes, com um sorriso covarde. Utilizando uma webcam ou um headset de realidade virtual, os jogadores são colocados no pequeno quadro de um bebê - Isaac - que começa a desenvolver habilidades misteriosas. É da responsabilidade do bebê psíquico **bet 365 cadastro** desenvolvimento chegar aos termos com seus dons crescentes, movendo os olhos para dobrar seu enorme ambiente à **bet 365 cadastro** vontade. Preferencialmente, Parkes explica, sem assustar os pobres pais de Isaac.

Ansiedade sophomore... Goodnight Universe.[aposta personalizada bet nacional](#)

Soando mais como Boss Baby do que um indie amado, a história de < Goodnight Universe > é definitivamente um desvio de tom, e um que levou a equipe um tempo para aterrissar. "Tínhamos essa ansiedade de álbum sophomore por um tempo muito longo", diz Parkes. "A ponto de eu me lembrar de ter instituído uma regra **bet 365 cadastro** que não podíamos sequer falar sobre < Before Your Eyes > **bet 365 cadastro** nossas sessões de brainstorm."

Felizmente, a inspiração final veio de uma nova cara na sala de reuniões. "Nosso designer principal, Bela, teve seu primeiro filho", diz Parkes. "Ela começou a vir às reuniões e estava **bet 365 cadastro** uma idade **bet 365 cadastro** que você a colocaria e quase esqueceria que ela estava lá, enquanto ela simplesmente se sentava olhando uma coisa por uma hora. Nós nos tornamos conhecidos como as pessoas que fazem jogos **bet 365 cadastro** que você não se move muito ... Eu percebi que ela me olhava quietamente e foi o momento 'Oh, merda!'" < Goodnight Universe > nasceu.

Uma jornada estranha e comovente

De mudar canais de TV com movimentos bruscos a fazer blocos de madeira voarem, < Goodnight Universe > leva os jogadores no estranho e emocionante jornada de Isaac para entender suas habilidades, ganhar aceitação de **bet 365 cadastro** família e evitar ser sequestrado por uma corporação tecnológica sombria. Com nosso protagonista usando fralda,

Lewis Pullman de Top Gun: Maverick, e um elenco de apoio com atores de TV e programas como Veep, Barry e The Daily Show, o estúdio de LA aproveitou sabiamente **bet 365 cadastro** proximidade com Hollywood.

"Acredito que muitos indies ficam assustados com [os sindicatos] e atores que apenas fazem filmes e TV", adiciona o diretor e compositor do jogo, Oliver Lewin, "mas a verdade é que os atores estão realmente entusiasmados com essa coisa."

Tecnologia de rastreamento facial... Goodnight Universe.[aposta personalizada bet nacional](#)

Graças à vitória do BAFTA, < Before Your Eyes > acabou transcendendo suas origens de webcam, chegando à PlayStation VR2 e encontrando um lar na crescente biblioteca de jogos móveis do Netflix. Embora você possa jogar < Goodnight Universe > **bet 365 cadastro** VR e desativar o rastreamento facial, para Lewin a história do jogo está casada com a webcam humilde. "Para nós, a tecnologia de rastreamento facial é tudo sobre adicionar imersão extra", diz Lewin. "Isso realmente me surpreende que [poucos] desenvolvedores estejam explorando isso ... há muito o que você pode fazer com apenas uma webcam simples, e todos têm um."

"Nossos jogos são - de muitas maneiras, filmes jogáveis", adiciona Parkes. "Acho que o que realmente nos motiva mais do que qualquer um dos controles emocionantes é como usamos essa mídia para contar nossa narrativa de maneira interessante e única."

Em um meio construído **bet 365 cadastro** matar dragões, fragar demônios e empreender fantasias de poder interestelares, há algo refrescantemente charmosa sobre < Goodnight Universe >. No entanto, depois de chorar minhas férias com < Before Your Eyes >, se há alguém que pode fazer justiça a essa estranha premissa, é um coletivo de arte de jogo excêntrico de LA.
