Funk Master Online Slot Review

Head

back to days of Disco in the 3 Funk Master online slot from NetEnt. A colorful 8x8 symbol grid features colorful glitterballs that pay out when you match 3 them in clusters, while an Avalanche mechanism drops new symbols onto the game, potentially forming new wins over and over.

Wild 3 symbols can dance around during any series of Avalanches, helping to complete winning clusters, and random multipliers can increase your 3 payout values by up to 10x. Dancing wilds remain active throughout a free spins bonus feature, where it's easier to 3 spawn further wilds across expanded reels.

Wins from this high

volatility game can reach 3,337x the stake and it has a 3 long-term payback percentage of 96.04%. You can play the Funk Master slot on PCs or mobiles at the or the 3 featured at gambling.

How to Play the Funk Master Slot Machine

Load the Funk Master slot onto an iOS, Android, or Windows 3 mobile, or desktop device and you'll soon be tapping your feet to the suitably funky soundtrack. An electric blue backdrop 3 contrasts with the yellow, blue, green, pink, and other colorful glitterballs. There's even a multicolor version that can act as 3 others if needed, and you can also see red bombs with multiplier values attached in any spin. We'll reveal the 3 purpose of these, as well as the 2x2 bubble on the grid, in the next section.

For now, take a look 3 at the controls, which are easy to use and give you a wager range of 0.20 to 200.00 on each 3 spin. Just tap the stack of coins on the panel and pick from any of the 47 staking options. A 3 Bonus Buy option unlocks the free games feature for 125x your wager.

Other controls include the circular arrow, which sets the 3 reels spinning automatically, and the fast forward button, which speeds up the gameplay. Tap the 'I' on the controls and 3 you go through to a paytable which reveals how to win, how much each symbol pays, and how the extra 3 features, such as Dancing Wilds can lead to extra prizes.

Funk Master is a cluster pays game and to win, you 3 need 6 or more matching symbols grouped together. The orange glitterball pays the most, at 0.25 your wager for a 3 cluster of 6, increasing to 25x for a cluster of 20 or more.

#### Free Spins & Other Funk Master Slot Features

An 3 Avalanche mechanism removes all winning symbols and allows those above to drop into the gaps as new symbols rain down 3 from above the reels. If this creates a new win, the process repeats, with no limit to how many Avalanches 3 can trigger in a series.

Bright red bombs can appear at any time and these feature 2x, 3x, 5x, or 10x 3 multiplier values which apply to any wins from the same spin. If multiple bombs are in view, their values combine.

The 3 multicolor

Dancing Wild symbol can act others if needed. If it's part of a win, the wild stays on the 3 grid, moving 1 row or reel, then locking in place for any further Avalanches. The 2x2 bubble is a Dancing 3 Wild Hotspot that appears in random places on each spin. If all 4 symbol positions under the Hotspot are part 3 of a win, either in a single spin or over the course of a series of Avalanches, a further Dancing 3 Wild symbol appears.

If you

form 3 or more wilds over a series of Avalanches, you get 6 . The wilds 3 stay active throughout as the Hotspot increases to 3x3 size on an expanded symbol grid. You get 1 extra row 3 for every 2 Dancing Wilds formed in the Hotspot, although the reels stop growing at 12 rows high.

### Our Funk Master Online Slot Rating

Colorful glitterballs certainly make an impression across desktop and mobile versions of the Funk Master slot machine, and the soundtrack is very catchy. There's plenty going on at all stages, with clusters, wild symbols, multipliers, and the Avalanche mechanism all helping out in the base games.

It's easier to build high value

clusters in the free spins, with extra wilds across more symbol positions. Just 6 free games play out, and you can't retrigger them, but you still benefit from Avalanches throughout.
