Game Rules

European Roulette™ is a classic roulette game that features inside bets, outside bets, call bets, special bets, and favorite bets.

The roulette wheel has 37

slots numbered 0-36. The objective of the game is to predict which slot the ball will land in after the wheel is spun.

The minimum and maximum bets for the game are displayed on the MIN/MAX section of the table.

Payouts are made according to the

Paytable. To view the Paytable, click the i-button in the keypad, alternatively see the Payout section below.

How to Play

Select a chip value, place your bets, spin the wheel, and wait to see if you have correctly predicted the winning number.

Selecting a chip

value. To select the desired chip value, click a chip in the keypad area. If there are active arrows to the left and right of the chips, click these to see additional chip values.

You can point at different positions of the table to highlight the bets. When a bet position is highlighted, a window appears and displays the minimum and maximum bet limits for that bet.

Placing one or several bets. To place a bet, select the chip value and click either a number or a betting position on the table. Additional clicks add the required number of chips of the same value to the selected bet area.

After a bet is

placed, you can point at the chips on the table to view the total value of the bet and the total payout if the bet wins.

Spinning the wheel. When you have finished betting, click the spin button to start a game round. The ball is then launched into the roulette wheel. The amount you bet is deducted from your account. The ball lands in a slot and the number on the slot is the winning number.

A player can stop the roulette

wheel anytime while it is spinning, by clicking the spin button. This function is not available during Autoplay (not available in all casinos).

It is possible to spin the

wheel without placing any bets (not available in all casinos).

Checking the winning

number. When the ball lands in a slot, the winning number is announced and all winning bets are paid. The winning number is displayed on the roulette wheel. Your winnings are also displayed in the game panel and are added to your Cash amount. All losing bets are cleared from the table.

Playing again. Click the rebet button to place the same bet as

in the previous round. Alternatively, click the clear all bets button to clear the

table of all previous bets, place any new bets, and then click the spin button. For more information, refer to the Game Functions section below.

The theoretical return to

player for this game is 97.30%.
