## Introduction:

Gambling disorder is a serious problem that affects millions of people around the world. It is characterized by a persistent and recurring pattern of maladaptive gambling behavior that disrupts an individual's life. The development of apps for gambling has made it easier for people to engage in gambling activities, which can exacerbate gambling disorder. Therefore, it is essential to develop effective interventions that can help individuals with gambling disorder to control their gambling behavior. This case study aims to evaluate the effectiveness of a novel app for treating gambling disorder.

## Background:

Several studies have investigated the effectiveness of various interventions for gambling disorder, including cognitive-behavioral therapy, motivational interviewing, and medication. However, there is limited research on the use of apps for treating gambling disorder. The app we aim to evaluate is designed to help individuals with gambling disorder by providing them with tools and strategies to control their gambling behavior.
