Gold Roulette Software applies to straight up bets (single numbers).

The numbers you have to bet on are selected according to their position on the wheel after a few balls of observation.

These first balls are used to define which are the hot zones of the wheel, and in contrast the cold zones. 3 hot zones and 3 cold zones will need to be defined before bets can be placed. Once this is done, we will bet on each of them, one after the other, when the optimal conditions are met.

Of course all this will be handled automatically by the software. The only thing you have to do is to manually enter the results of each spin.

A hot zone is a 3-number portion of the wheel where the center number appears 3 or more times. For example, the zone 30-8-23 will be said to be a hot zone as soon as the number 8 has hit 3 times, regardless of the number of times the neighboring numbers (30 and 23) have hit.

A cold zone is a 3-number portion of the wheel where none of the three numbers appeared during the period used to detect the 3 hot zones.

Numbers that do not belong to either the hot or cold zones are called neutral numbers. No bet will be placed on them.

The aim of this method is to win one attack on the hot zones and another on the cold zones per game. Each attack will be launched only when the optimal conditions are met (estimated automatically by the data engine).

Two versions available:

- Single-zero Wheel Version (European Roulette)
  - Double-zero Wheel Version (American Roulette)
-
