you still haven't watched

Rena Baby

, a story that starts with the experience of Richard Gadd **world sport** star and a persecutor. You probably have good reasons for this not being because no one recommended it for example; you said it was extraordinary or powerful – not unique – because you still never heard of it: its success was surprising (in more ways than one **world sport** question) but I tell you it's at the top of my Netflix UK and BR lists weeks after its release!

Nevertheless, since the start of the vaccine – created by research teams led by professor Andy Pollard and professor Sarah Gilbert at the Oxford Vaccine Centre – it has been marked by controversy. It was linked to blood clots; US observers criticized protocols for its trials? and French president Emmanuel Macron said it was "almost ineffective" for people over 65. De fato...

In very rare cases, the AZ vaccine can cause blood clots. According to the British Heart Foundation a study in *BMJ*
